

ZANE STATE COLLEGE

TEST SECURITY

This policy applies only to courses that use Respondus LockDown Browser and Respondus Monitor. For more details, please reach out to your instructor. These tools help maintain exam integrity by restricting browser functions and/or a webcam to ensure students do not access unauthorized materials during exams. If you are unable or unwilling to use these proctoring tools, you must arrange to take the exam on-campus through Testing Services. Be aware that due to capacity and social distancing constraints, requests may not always be accommodated. To ensure availability, students are advised to make arrangements well in advance if choosing the on-campus testing option. It is the student's responsibility to coordinate with both their instructor and testing services for an alternative plan.
